

ABBEVILLE AREA MEDICAL CENTER

Mobile Modular provided a modular MRI unit to Abbeville Area Medical Center in order to not disrupt daily medical operations and meet the center's budget.

THE BACKGROUND

Abbeville Area Medical Center was in need of adding a new MRI unit to its existing facility. Due to limited space and the need for a permanent location for their new MRI machine, Abbeville Area Medical Center believed that a modular unit would be more cost-efficient, as opposed to a mobile unit.

THE CHALLENGE

The design had to maintain a cohesive architectural aesthetic with the existing campus, the placement had to fit within the available footprint, and the construction had to be carried out in a manner that did not disrupt daily medical operations.

Customer Name: Abbeville Medical Center

Project Location: Abbeville, SC

Building Type(s): Healthcare

Module Count: Sale

Total Sq. Ft: 600 sq. ft.

THE SOLUTION

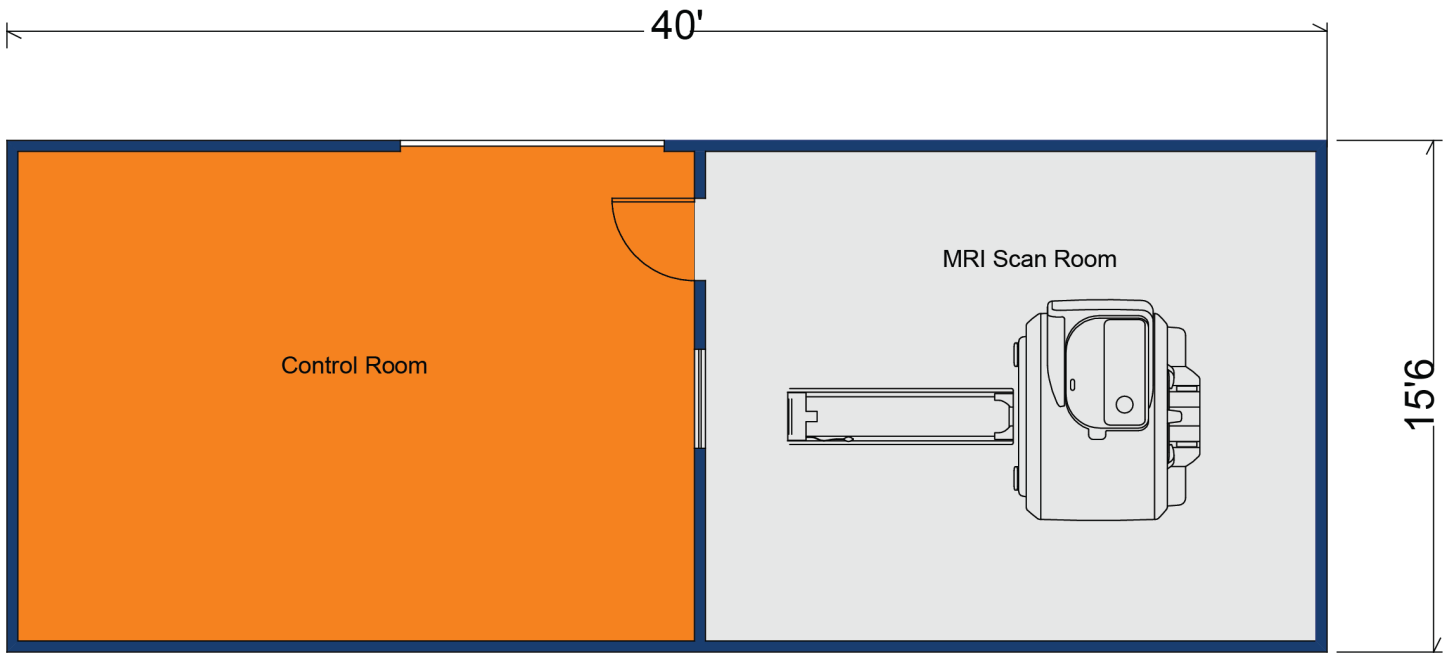

With a brick exterior, the modular building blends effortlessly into the overall medical center. Modular construction proved to be an effective solution because not only did it minimize operational disruption, but it also allowed site work to progress concurrently with the fabrication of the modular unit, thereby reducing the project schedule.
