

CENTRAL BUCKS SCHOOL DISTRICT

Mobile Modular helped Central Bucks School District tackle its increasing student population by providing suitable modular classrooms.

THE CHALLENGE

Central Bucks School District needed an additional 4 classrooms for at least 6 years due to increased enrollment.

THE SOLUTION

Mobile Modular was able to step in and provide a turn-key classroom solution with carpet tiles, fire suppression, and a connecting ADA corridor to the existing school. We were able to utilize a cooperative purchasing agreement which avoided a public bid, this helped speed up the timeline and ensure that they had the space for the start of school.

Customer Name: Central Bucks School District

Project Location: Doylestown, PA

Building Type(s): Modular Classrooms
