

# CITY OF LEWISVILLE FIRE DEPARTMENT

Mobile Modular built a permanent new fire department crew quarters building, complete with custom offices and a custom kitchen.

## THE CHALLENGE

The City of Lewisville Fire Department required a new crew quarters building to maintain their 24/7 operations. Their existing building was non-compliant and had system issues, necessitating a rapid solution. To meet strict time constraints and specific needs like backup power, crew quarters, office space, dispatch offices, and a custom kitchen, Lewisville opted for a custom modular building.

## THE SOLUTION

Because a custom solution was chosen, Mobile Modular provided multiple custom floor plans for The City of Lewisville Fire Department to choose from. The placement of windows, outlets, and doors was taken into consideration to best fit the city department's needs. Manufacturing, delivery, and installation were completed within the time frame allotted which allowed the crew members to move in quickly. Time, money, and space on site were saved with the decision to go modular.
