

LIMETREE BAY REFINING DORMITORIES

Mobile Modular relocated 489 modular buildings from Saskatchewan to the Caribbean. The process was on time and within the given budget.

THE CHALLENGE

The Limetree Bay Terminals facility consists of approximately 32 million barrels of crude oil and petroleum product storage, idled refinery units with a total peak processing capacity of 650,000 barrels per day, and a deep-water port with 10 petroleum docks.

THE SOLUTION

The first 1,020 beds were ready within 6 months (with 450 additional beds delivered and installed in the following months). The project entailed the coordination of hundreds of contractors, trucking, rail, and ocean freight over 5,000 miles – all on time and on budget.

Customer Name: Limetree Bay Refining

Project Location: St. Croix, USVI

Building Type(s): Modular Dormitories

Module Count: 489

Total Sq. Ft: ~400,000 sq. ft.
