

# OLD REDFORD ELEMENTARY SCHOOL 2-STORY BUILDING

Mobile Modular created sustainable modular two-story classrooms for Old Redford Elementary School, featuring a glass atrium, ceramic tile work, and more.

## THE CHALLENGE

The current school was housed in an older building which was no longer appropriate as an education facility. The school board recognized the need for a new building, however, they had a very short time frame. They required a creative cost-effective solution without sacrificing quality. The school board looked to Mobile Modular to design a building both interior and exterior that would embody the mission of the school: "to successfully educate all students providing them with stimulation and challenging experiences in a clean, safe and healthy environment.

**Customer Name:** Old Redford Elementary School

**Project Location:** Detroit, MI

**Building Type(s):** Permanent Education Building

**Job Type:** Sale

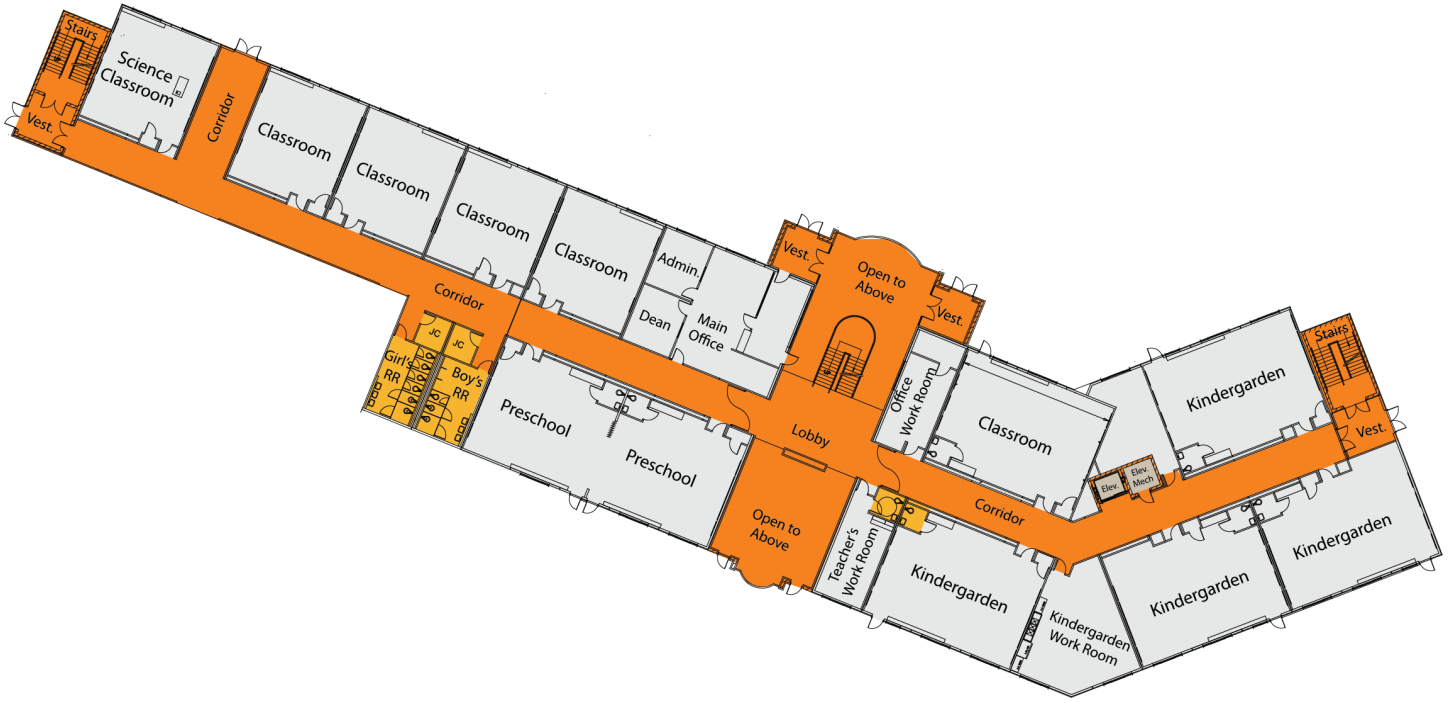

**Total Sq. Ft:** 56,000 sq. ft.

## THE SOLUTION

The fast-track construction of this school was accomplished by building two, 2-story classroom wings centered around a glass atrium. The design also incorporated using the pre-existing cafeteria and gymnasium for the new building to maximize cost savings. The four modular wings feature spacious classrooms and recessed lockers. Each wing has a unique color scheme which provides not only an exciting learning environment but also assists in defining grade levels.
