

SPELMAN COLLEGE ART STUDIO

Mobile Modular provided a quick solution and created additional art space for Spelman College with modular construction.

THE CHALLENGE

The facility was outfitted with special floor and fireproof materials so that a kiln could be installed for firing ceramic pottery. There were a few challenges beyond the fireproofing that Mobile Modular was able to solve.

THE SOLUTION

Mobile Modular had to remove an existing iron fence and the building was set on a slope. The site-installed ramps and steps also needed to accommodate this steep incline. Mobile Modular worked around all obstacles to provide a solution to meet the needs of the students.

Customer Name: Spelman College

Project Location: Atlanta, GA

Building Type(s): Modular Classrooms

Module Count: 3

Total Sq. Ft.: 2,160 sq. ft.
