

SUBARU OF INDIANA AUTOMOTIVE

Mobile Modular provided an on-time and under-budget modular office for Subaru of Indiana Automotive to improve the delivery process.

THE CHALLENGE

The 4.7 million SF Subaru of Indiana Automotive receives over 800 semi-trucks carrying production parts daily. In order to minimize the cost of inventory and the space required under the roof to store SIA operates with a “Just in Time” parts delivery system. As production rates ramped up transport carriers arriving on site were experiencing extended wait times to check in and drop their loads.

THE SOLUTION

A new modular Transportation Logistics Office and additional roads were installed on site in 2019 to improve the efficiency of the parts delivery process. Mobile Modular worked with SIA at the project inception to design and specify the new modular building. The project was completed on time and under budget.

Customer Name: Subaru of Indiana Automotive

Project Location: Lafayette, Indiana

Building Type(s): Modular Office

Module Count: 3

Total Sq. Ft: 2,356 sq. ft.
