

TRAPHAGEN ELEMENTARY SCHOOL

Mobile Modular made sure an elementary school in Mount Vernon City School District met New York State standards in time for the start of the school year.

THE CHALLENGE

Mount Vernon City School District was renovating Traphagen Elementary School which was not going to be completed in time for the start of the school year. We worked with the client to utilize an existing 2-classroom building to meet their needs. They did not need restrooms so we converted the existing restrooms into storage closets. The NY State Education Department has a requirement that younger students need to have a covered walkway to go from the main school to the modular classroom.

Customer Name: Traphagen Elementary School

Project Location: Mount Vernon, NY

Building Type(s): Modular Classrooms

Module Count: 2

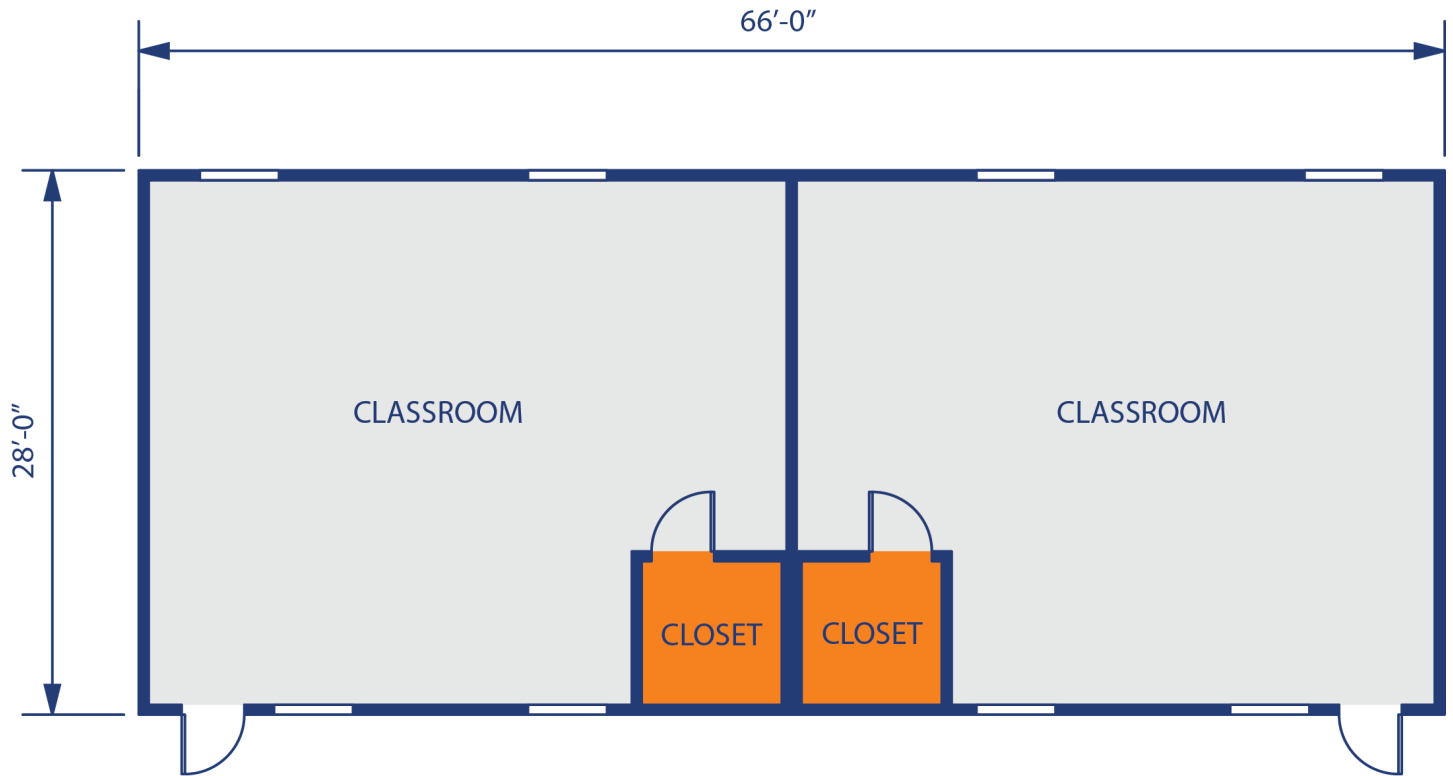

Total Sq. Ft: 1,848 sq. ft.

THE SOLUTION

Mobile Modular went with a prefabricated aluminum canopy that allowed the students to stay dry all day. After the modular classrooms were removed at the end of the school year, the district elected to keep the canopy in place so their students would stay dry while they waited for their bus in the bus loop.
