

# VANDEBILT CATHOLIC HIGH SCHOOL

Mobile Modular quickly provided a school with a temporary modern shower/locker room after a hurricane destroyed their previous locker room.

## THE CHALLENGE

In August 2021, hurricane Ida devastated Vandebilt Catholic High School, including their locker room. To continue facilitating their sports programs, their campus needed a temporary locker room. Due to the strict timeline, Mobile Modular's solutions were recommended to VCHS by a local architect.

## THE SOLUTION

Mobile Modular was contacted by the school to develop and provide a floor plan that would benefit the school's sports teams. The modular solution was to deliver and install seven modules for a total of 4,648 sq. ft. with a 24-month lease option. The units were manufactured, delivered, and installed within the stringent time frame needed, allowing the school to resume its athletic programs with a fully functioning locker room on campus.
